## PROFILE SUMMARY

- Working as a Frontend Developer in **Angular 2+** versions, **React JS developer** in the software industry with an overall **2.3+** years of experience.
- Proficient in designing, developing, and implementing integration solutions using WebMethods, with expertise in Integration Server, Designer, and Trading Networks. Strong background in **Java, SQL, and API development**, along with skills in mapping, transformations, and troubleshooting for optimized integration processes. Experienced in Agile methodologies, cloud integration platforms, and technical documentation to ensure scalable, reliable, and high-performance architectures.
- Strong problem-solving skills and proficiency in **React.js and JavaScript, TypeScript also good** knowledge of Java Node.js and Express.js**.**
- Sound knowledge of **Data structures and algorithms**, **Object-oriented programming**, and responsive UI UX design.
- Looking for an opportunity to showcase my skills to enhance my knowledge as well as contribute to my organization to the best of my potential.

---

## WORK EXPERIENCE

### Software Engineer

**Mavertech Technologies, Nashik**                                                                 **May 2023 – Present**

- **Develop Web Applications:** Led Angular projects for healthcare, such as a patient record management system for United Health Group, enhancing efficiency and user experience.
  Utilized frameworks like JavaScript, jQuery, Angular, along with Bootstrap and Material CSS, to create responsive and dynamic web applications.
- **Create UI Components:** Developed reusable UI components: using Angular's Two-Way Binding, Custom Directives, and Services, improving modularity and reusability.
  Built advanced widgets with Vue.js and Angular, such as drag-and-drop interfaces and inline editing, to enhance interactivity and user engagement.
- **Focus on Performance and Reusability**: Designed and implemented Custom Directives for complex features like grid and map rendering, optimizing application performance.
  Developed Single Page Applications (SPAs) for seamless user experiences, ensuring fast load times and smooth navigation across the app.
- **Implement REST APIs:** Integrated CRUD operations through RESTful APIs, ensuring robust communication between the frontend and backend services.
  Leveraged strong knowledge of TypeScript and GitHub for clean, maintainable code and efficient version control, enhancing collaboration.
- **Debug and Test:** Utilized Chrome Developer Toolbar and other debugging tools to identify and resolve issues, maintaining application stability across platforms.
  Ensured cross-browser compatibility and conducted rigorous testing in an Agile environment, adhering to Test-Driven Development (TDD) methodologies.

### Software Engineer Trainee

**SteepGraph System Pvt Ltd, Pune**                                                                **July 2022 – April 2023**

- **Develop Web App:** Worked on Angular projects focusing on internal applications. Developed a web app to manage records within the organization.
- **Develop UI Components:** Created reusable UI components using Angular features like Two-Way Binding, Custom Directives, and Services. Built widgets using Vue.js and Angular, including image drag and drop, indented tables, inline editing, and E-BOM comparison.
- **Focus on Performance and Reusability:** Designed and implemented Custom Directives for enhanced functionality, such as grid and map rendering. Developed Single Page Applications (SPAs) to ensure seamless user experiences and employed best practices for performance optimization.
- **Implement REST APIs**: Developed and implemented CRUD operations using REST APIs to interact with various endpoints, ensuring robust integration with backend services.

**Software Engineer Trainee (Intern)**
**Quiesta Technologies, Pune**                                                                                   **Nov 2021 – June 2022**
- **Develop User Interface**: Worked as a front-end developer on an internal project. Built, developed, and tested UI components with
  **JavaScript and JavaScript Libraries**.
- **Develop Landing Page**: Developed the landing page of the application with **Bootstrap** and worked on the routing and navigation of the application.

**SKILLS**

| | | |
|---|---|---|
| JavaScript | React.js | Java |
| Node.js and Express | Redux | RESTful API |
| Angular 2+ versions | HTML5 | Waterfall, Agile and Scrum |
| Bootstrap | CSS | Test-Driven Development |
| React testing library SQL | MongoDB | Postman |
| MySQL | GitHub | JIRA |
| Webpack | Git | |

---

**PROJECTS**
**Projec**t: CareSource
**Company**: Mavertech Technologies
**Description**: Proficient in Angular features like Two Way Binding, Custom Directives, and Services. Designed and implemented Custom Directives for enhanced functionality.
Developed Single Page Applications (SPAs) to ensure seamless user experiences. Collaborated in an agile environment, practicing continuous delivery and pair programming. Employed custom directives for grid and map rendering.  Created data collection forms with HTML and JavaScript validation. Ensured cross-browser compatibility across major platforms.
**Tools & Technologies:** Angular, JavaScript, Typescript, HTML, CSS, MySQL, JSON
